PROFESSIONAL SUMMARY

Full-Stack Web Developer experienced in building complete, production-ready web applications — from Laravel/PHP backends to Vue.js/Nuxt.js frontends. Skilled in designing secure RESTful APIs with JWT and Sanctum authentication, and working across relational and NoSQL databases (MySQL, SQLite, MongoDB), applying MVC architecture, OOP, and SOLID principles to write clean, maintainable code. Comfortable owning the entire stack from database design to deployment, with hands-on project experience and strong problem-solving and communication skills.

SKILLS

Backend: PHP, Laravel, RESTful API Design & Development, JWT Authentication

Databases: MySQL, SQLite, MongoDB, SQL

Frontend: Vue.js, Nuxt.js, JavaScript(ES6+), TypeScript, HTML5, CSS3, Tailwind CSS, Bootstrap, SASS

Tools & DevOps: Git, GitHub, Docker, Postman, Linux

Core Concepts: MVC, OOP, SOLID, Data Structures & Algorithms, Database Design

PROJECTS

YourMenuPage – Online Menu Platform | Laravel, Inertia.js (Vue.js), Sanctum, MySQL, Docker

- Developed a secure full-stack restaurant menu platform using Laravel, implementing authentication, role-based access control, and RESTful CRUD operations.
- Designed and optimized the MySQL database using Eloquent relationships, and containerized the application with Docker for consistent development environments.
