Summary

Junior Full-Stack Developer specializing in Laravel and Vue.js, experienced in building scalable SPA applications. Skilled in RESTful API development, authentication systems, database design, and responsive UI implementation.

TECHNICAL SKILLS

- **Front-end Development**
  - HTML, CSS, JavaScript, TypeScript
  - Vue.js, Nuxt.js
  - Tailwind CSS, Bootstrap, SASS
  - Responsive & Mobile-First Design
- **Back-end Development**
  - PHP, Laravel
  - RESTful API Development
  - Authentication & Authorization
  - MVC Architecture
  - Basic knowledge of OOP & SOLID principles
- **Databases**
  - MySQL, SQLite
  - MongoDB
- **Tools & Workflow**
  - Git & GitHub
  - Clean Code Practices
  - Basic Performance Optimization

PROJECTS

❖ Hisouby - Mathematics Learning Platform

A full-stack single-page application (SPA) developed with Nuxt.js, utilizing Firebase Firestore for real-time data management and Firebase Authentication for secure user

access. Deployed on Firebase Hosting. Designed as an interactive mathematics learning platform for students from elementary to high school levels.

➢ **Key Features:**

- Secure user authentication using Firebase Authentication
- Structured math exercises categorized by grade level
- Real-time data synchronization with Firebase Firestore
- Progress tracking system to monitor student performance over time
- Performance dashboard with dynamic statistics and progress visualization
- Instant feedback system for submitted answers
- Responsive, mobile-first user interface
- Cloud deployment via Firebase Hosting

➢ **Tech Stack:**

- Nuxt.js • Tailwind CSS • Firebase (Firestore, Authentication, Hosting)

❖ YourMenuPage – Online Menu Management Platform

A full-stack single-page application (SPA) built with Laravel, Inertia.js, and Vue.js. The platform enables restaurants and coffee shops to create, manage, and publish digital menus through a secure and user-friendly dashboard.

➢ **Key Features:**

- Secure authentication and session management using Laravel Sanctum
- Role-based access control for administrators and business owners
- Dynamic menu management with full CRUD operations
- Category and item organization with relational database structure
- Responsive dashboard interface built with Vue.js
- RESTful API architecture with structured validation and error handling
- Optimized database queries using Eloquent relationships

➢ **Tech Stack:**

- Laravel • Laravel Sanctum • Vue.js • Inertia.js • Tailwind CSS • SQLite
