## Summary

---

**Junior Full-Stack Developer** specializing in Laravel and Vue.js, experienced in building scalable SPA applications using Inertia.js and Nuxt.js. Skilled in RESTful API development, authentication systems, database design, and responsive UI implementation.

## TECHNICAL SKILLS

---

### ❖ Front-end Development

- HTML5, CSS3, JavaScript (ES6+), TypeScript
- Vue.js, Nuxt.js
- Tailwind CSS, Bootstrap, SASS
- Responsive & Mobile-First Design

### ❖ Back-end Development

- PHP, Laravel
- RESTful API Development
- Authentication & Authorization
- MVC Architecture
- Basic knowledge of OOP & SOLID principles

❖ **Databases**

- MySQL, SQLite
- MongoDB

❖ **Tools & Workflow**

- Git & GitHub
- Clean Code Practices
- Basic Performance Optimization

## PROJECTS

---

❖ **Hisouby - Mathematics Learning Platform**

A full-stack single-page application (SPA) developed with Nuxt.js, utilizing Firebase Firestore for real-time data management and Firebase Authentication for secure user access. Deployed on Firebase Hosting. Designed as an interactive mathematics learning platform for students from elementary to high school levels.

❖ **Key Features:**

- Secure user authentication using Firebase Authentication
- Structured math exercises categorized by grade level
- Real-time data synchronization with Firebase Firestore
- Progress tracking system to monitor student performance over time
- Performance dashboard with dynamic statistics and progress visualization
- Instant feedback system for submitted answers
- Responsive, mobile-first user interface
- Cloud deployment via Firebase Hosting

❖ **Tech Stack:**

- Nuxt.js – Tailwind CSS - Firebase Firestore - Firebase Authentication - Firebase Hosting

**Live Demo:** <https://hisouby.web.app/>

**GitHub Repository:** <https://github.com/hayder-abbas/hisouby>

## ❖ YourMenuPage – Online Menu Management Platform

A full-stack single-page application (SPA) built with Laravel, Inertia.js, and Vue.js. The platform enables restaurants and coffee shops to create, manage, and publish digital menus through a secure and user-friendly dashboard.

### ❖ Key Features:

- Secure authentication and session management using Laravel Sanctum
- Role-based access control for administrators and business owners
- Dynamic menu management with full CRUD operations
- Category and item organization with relational database structure
- Responsive dashboard interface built with Vue.js
- RESTful API architecture with structured validation and error handling
- Optimized database queries using Eloquent relationships

### ❖ Tech Stack:

- Laravel - Inertia.js - Vue.js - Laravel Sanctum - SQLite - Tailwind CSS
